

# Image Retrieval with Deeplearning

Jeffrey Tang

# Who am I ?

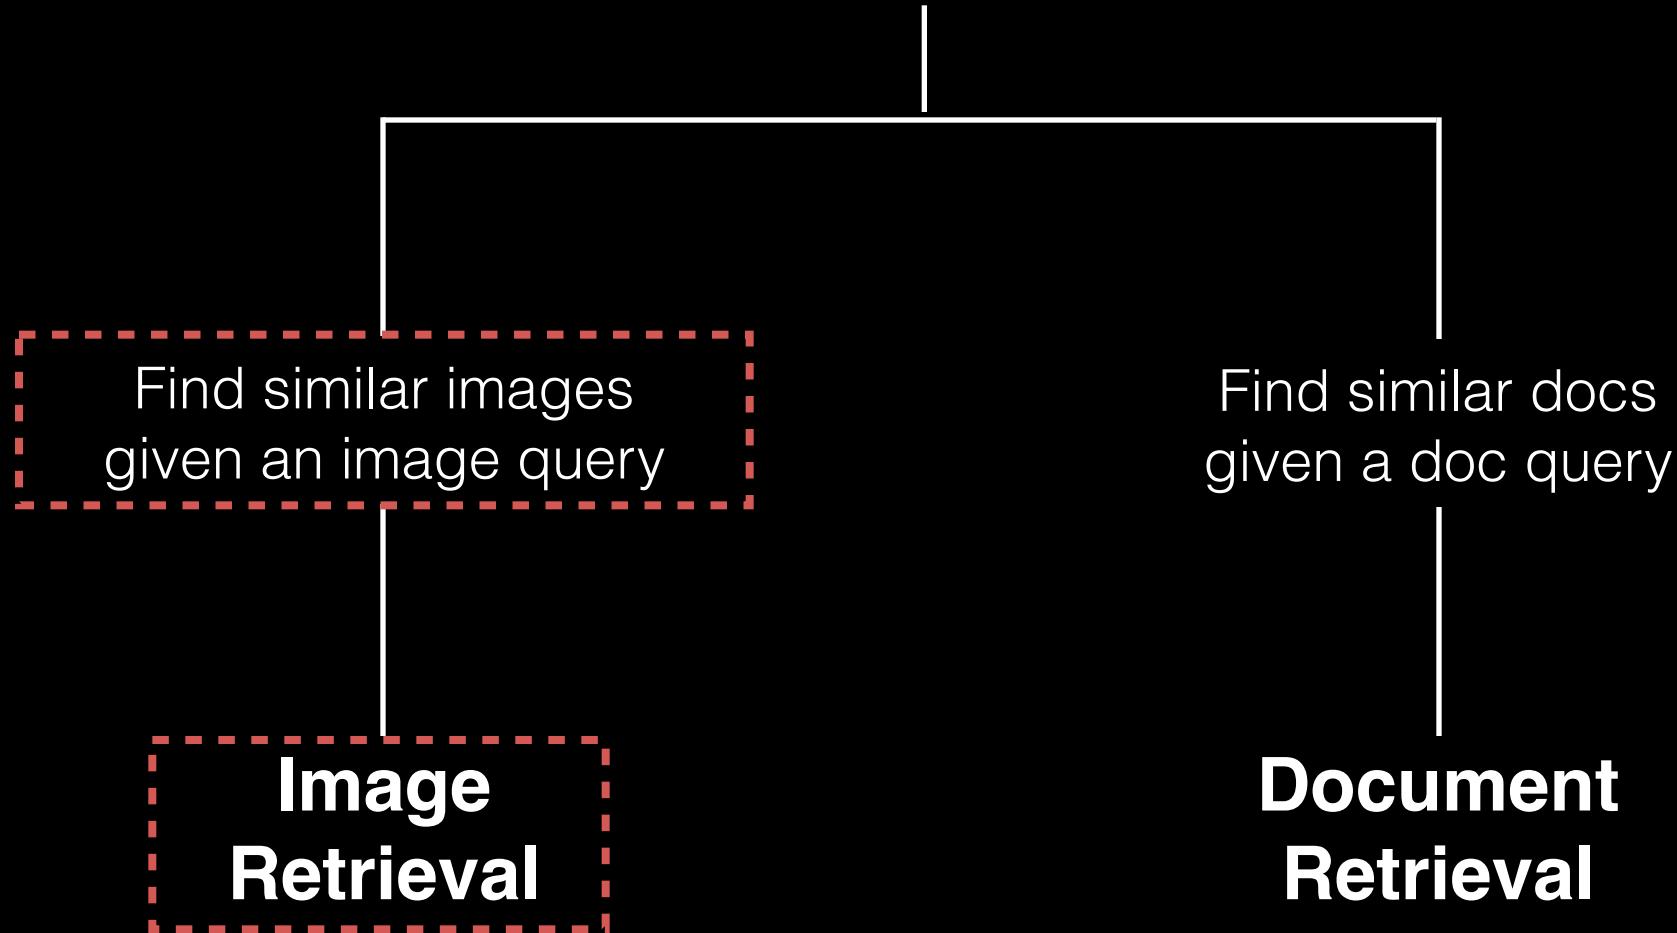

- **Software Engineer at Skymind.io**
  - Python Interface to deeplearning4j (Java)
  - Optimization of deep learning on Spark
- **(Ex-)Data Science Instructor at Galvanize**

# Goals

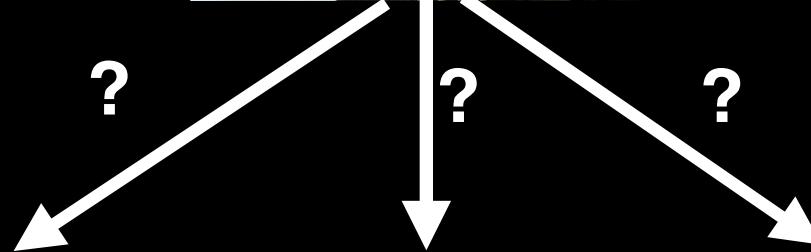

- **Image Retrieval**
  - ★ Application & Overview
- **Deep Learning**
  - ★ Image Retrieval using Auto-Encoders
  - ★ Code Example
- **Deep Learning Ecosystem**

# Image Retrieval Overview

# Information Retrieval

# Applications: Real Estate

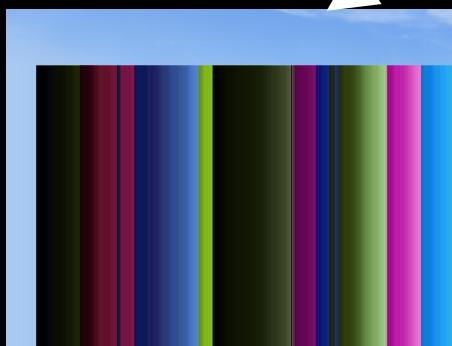

# Applications: Place Matching

?

?

?

# Applications: Product Matching

# High Level

- Image Retrieval == Image Recommenders
- Find similar images based on a query image
- Compare query to every stored image

## Images

# Why Reduce Dimension ?

- Yields a more **generalized (and better)** representation of the image
- More robust to noisy images
- **Faster computations**  
(Comparing fewer dimensions)

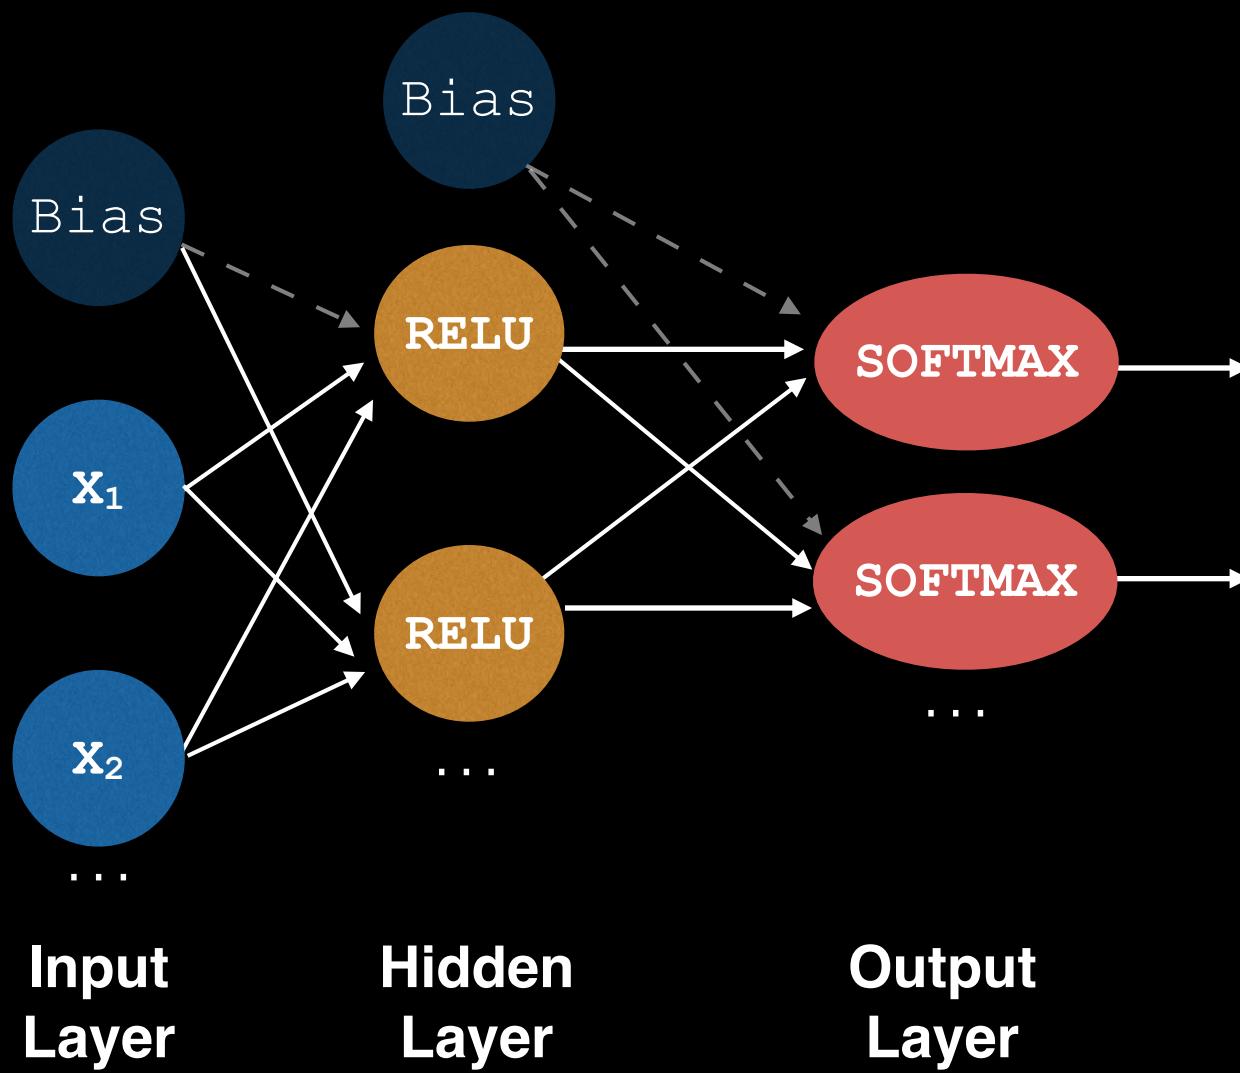

# Why Deep Learning ?

- **PCA / SVD** reduces dimension assuming **linear manifold** of the original feature space
- **AutoEncoders** is capable of reconstructing a **non-linear manifold**
- AutoEncoders yield better representation

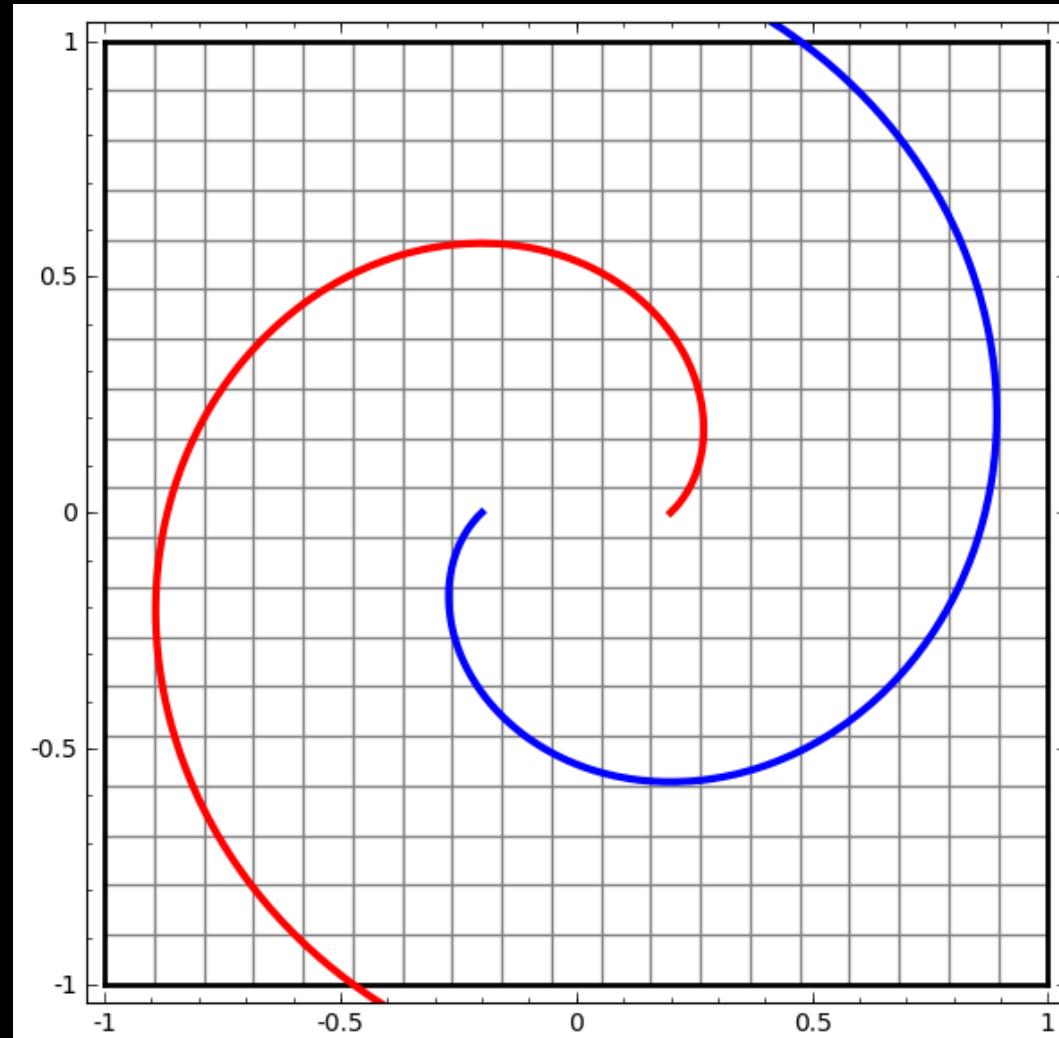

# Deep Learning

# Introduction

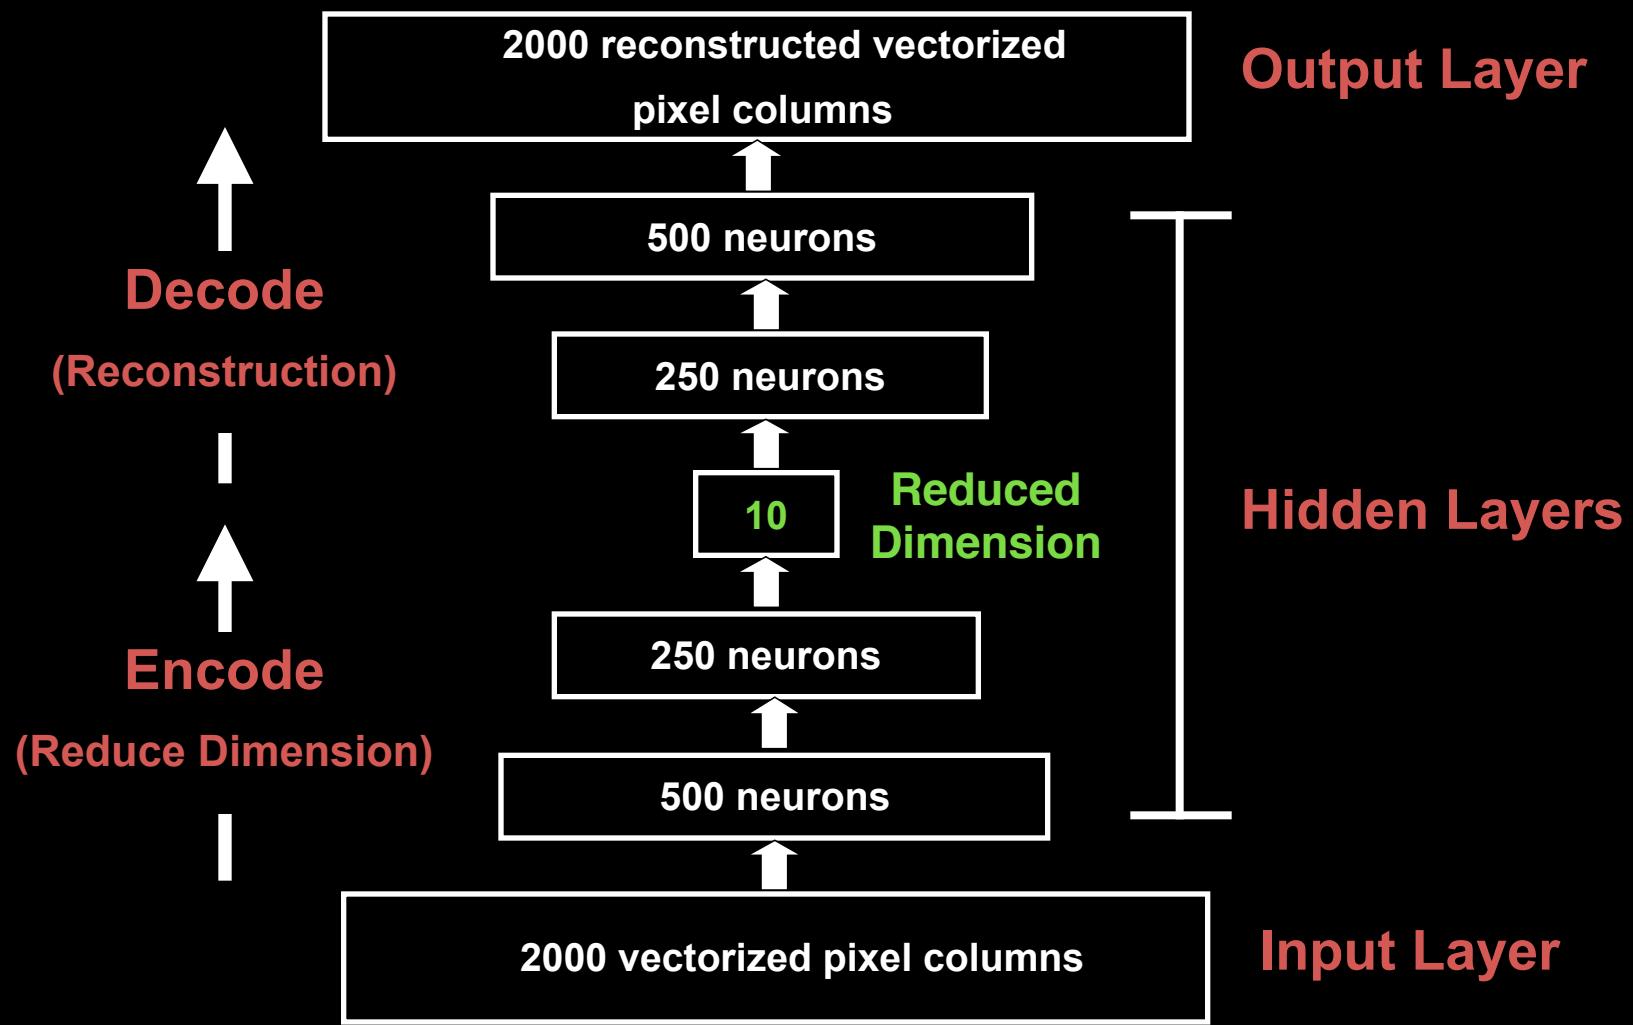

# FeedForward Neural Network

# Hidden Layer Transformation

# AutoEncoder

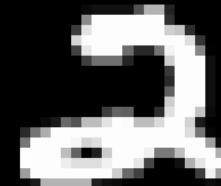

# Training AutoEncoder

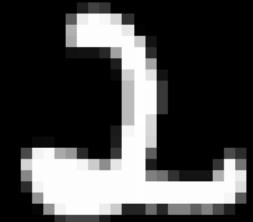

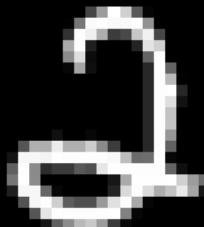

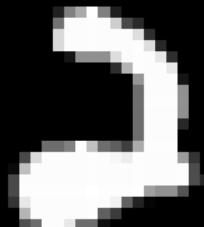

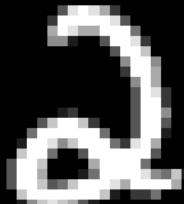

- **Output Layer reconstructs Input Layer**
- **Error** from reconstruction is **back-propagated through hidden layer** to update the weights
- Tricks for training deep AutoEncoders  
(Geoffrey Hinton et al 2006 Science)

# Why DeepLearning4j

- **Java:**  
Better integration with production systems
- **NN Features:**  
AutoEncoder, RBM and Recurrent (LSTM)
- **Distributed:**  
Training on distributed GPU (Spark)

# Distributed Deep Learning

# Road Map

- **Stable Release:** Aug / Sep, 2015
- **Optimized Release:** Oct / Nov, 2015
- **Python Interface:** Oct / Nov, 2015

Deep Learning for Java, Scala & Clojure on Hadoop, Spark & GPUs <http://deeplearning4j.org> — Edit

 2,651 commits  53 branches  22 releases  36 contributors

 Branch: **master** 

Merge pull request #523 from deeplearning4j/ablayerfixes 

 nyghtowl authored 12 hours ago	latest commit 5157070aff 	
 <a href="#">deeplearning4j-cli</a>	Changed name for remainder to max on numlinsearchiterations.	13 days ago
 <a href="#">deeplearning4j-core</a>	Remove incorrect deprecated annotation	a day ago
 <a href="#">deeplearning4j-scaleout</a>	fixed TextPipeline in Spark. Tests passed. Build Success	22 hours ago
 <a href="#">deeplearning4j-ui</a>	fix compilation error on update filters	10 days ago
 <a href="#">dl4j-caffe</a>	Fix straggler on descent name. Removed caffe stuff that is in progres...	14 days ago
 <a href="#">dl4j-test-resources</a>	done lookupcache	2 days ago
 <a href="#">.gitignore</a>	Minor cleanup	14 days ago
